# DIGITAL LITERACY PORTFOLIO PROJECT

Name: Achal V6inod Ghate

Registration Number: 25BAI11251

Branch: B.Tech

University: VIT Bhopal University

Date: 22 march 2026

## INTRODUCTION

In today's digital era, being digitally literate is essential for academic success and professional growth. This project was undertaken as part of the Digital Literacy course, where I assumed the role of a Student Digital Ambassador. The aim was to understand, apply, and promote responsible and effective use of digital tools among peers.

Throughout this project, I explored multiple aspects of digital literacy, including online safety, professional communication, digital collaboration, and cyber awareness. I also developed a practical understanding of platforms such as GitHub, LinkedIn, and Google Forms, which are widely used in academic and professional environments.

This project not only enhanced my technical awareness but also helped me build a strong foundation for maintaining a professional digital identity.

## 🟧 TASK 1: DIGITAL LITERACY INFOGRAPHIC

For Task 1, I designed a digital literacy infographic using Canva. The infographic focused on key areas such as the definition of digital literacy, safe internet practices, and useful digital tools for students.

The objective was to present important information in a visually engaging and easy-to-understand format. I used icons, structured sections, and minimal text to ensure clarity and readability. Designing the infographic helped me understand how visual communication can simplify complex ideas.

One challenge I faced was selecting the most relevant content while keeping the design clean and uncluttered. Overall, this task improved my creativity and presentation skills.

## 🟧 TASK 2: DIGITAL PORTFOLIO DEVELOPMENT

In Task 2, I created my digital portfolio across key platforms such as GitHub, LinkedIn, and HackerRank. GitHub serves as a platform to showcase projects and track learning progress, LinkedIn helps in building a professional network, and HackerRank provides opportunities to practice coding skills.

Setting up these profiles helped me understand the importance of having a professional online presence from the beginning of my academic journey. I ensured that all profiles were simple, clear, and focused on my learning goals.

In the coming years, I plan to actively use these platforms to document my projects, connect with professionals, and enhance my technical skills.

## 🟥 TASK 3: CODING & COLLABORATION PLATFORMS

Task 3 involved exploring coding and collaboration tools. I completed a beginner-level coding problem on HackerRank, which introduced me to basic problem-solving using programming logic.

Additionally, I created a Google Form titled "Digital Literacy Awareness Quiz" with five questions. This activity demonstrated how online tools can be used for knowledge sharing and assessment.

This task was particularly useful in understanding how digital platforms can support both individual learning and collaborative engagement. It also encouraged me to think practically about using technology in academic contexts.

## 🟪 TASK 4: PROFESSIONAL COMMUNICATION & ETIQUETTE

In Task 4, I drafted two professional emails and created a social media etiquette checklist. The emails were structured with proper subject lines, formal greetings, concise content, and appropriate sign-offs.

This task emphasized the importance of clear and respectful communication in academic and professional settings. I also created a checklist highlighting responsible behavior on social media, including both do's and don'ts.

Through this task, I realized how digital communication reflects an individual's professionalism and how small mistakes can create misunderstandings. It reinforced the need for clarity, politeness, and awareness in online interactions.

## 🟫 TASK 5: CYBERCRIME AWARENESS

In Task 5, I explored phishing as a common form of cybercrime. I developed a case study explaining how phishing attacks are carried out, how users are targeted, and the potential consequences such as financial loss and data theft.

I also created a prevention checklist with practical steps to stay safe online, including verifying links, avoiding suspicious messages, and using strong security measures.

This task significantly increased my awareness of online threats and the importance of cybersecurity. It encouraged me to adopt safer digital practices and be more cautious while using online platforms.

## ⚫ CONCLUSION

This project provided a comprehensive understanding of digital literacy and its importance in today's world. Through various tasks, I gained practical experience in using digital tools, communicating professionally, and maintaining online safety.

The project also helped me build my digital portfolio and develop a responsible approach towards technology usage. I believe these skills will be highly valuable in my academic journey and future career.

Overall, this project was a valuable learning experience that strengthened both my technical knowledge and digital awareness.
